# MCAS Results Spring 2021 

School Committee Presentation November 9, 2021

Wellesley Public Schools
Learning•Caring•Innovating

## Presentation Overview

- MCAS Basics
- Results
- ELA
- Math
- Science
- Peer District Comparison
- Next Steps

## MCAS Basics

## MCAS Basics

## Purpose

- To monitor district success in meeting student academic needs

> Use

- Information to adjust instruction
- Identify overlooked patterns of unmet needs

## Achievement

- MCAS score:
- ELA grades 3-8 and 10
- Math grades 3-8 and 10
- Science grades 5, 8, and high school

## Growth

- SGP based on MCAS scores: ELA and Math
- Student growth percentile

## MCAS Basics - ALT

- All students, including students with disabilities, participate in MCAS
- Standard MCAS testing,
- MCAS testing with at least one accommodation, or
- MCAS Alternate Assessment (MCAS - Alt)
- Participation method determined by students' teams
- Significant cognitive disability and
- Working substantially below grade-level expectations and
- Unable to partially demonstrate knowledge and skills on a standardized test, even with the use of accommodations
- OR a complex and significant disability
- MCAS-Alt consists of submitting a portfolio of materials
- $1 \%$ of WPS students completed an MCAS-Alt

## MCAS Changes due to COVID

## Accountability

- No determinations issued for 2021

Item Sampling for Non-High School Grades

- Some students taking session one, some students taking session two
- Aggregated scores allow for meaningful interpretations
- Individual student scores are more variable

## Administration

- Remote and in-person administration
- Similar performances in WPS and at the state level

## Participation

- $96 \%-99 \%$ participation rate in WPS, depending on grade level
- $89 \%-97 \%$ participation statewide, depending on grade level

## MCAS Changes due to COVID

## Measure of Student Growth - Student Growth Percentiles

- Measure of how much a student's achievement has changed since the prior testing
- Compares current score to that of peer groups: other students in the same grade who performed similarly in the past
- In prior years, peer groups were from within the same cohort (same class year):

## MCAS Changes due to COVID

## Measure of Student Growth - Student Growth Percentiles

- To accurately reflect the extent to which growth slowed due to COVID, "baseline SGPs" were created from a historical peer group.
- For 2021, the current score is compared to the historical peer group:

## MCAS Changes due to COVID

## Statewide Average Student Growth Percentiles (SGPs)

|  | 2019 <br> Cohort-Based Method |  | 2021 <br>  <br> Naseline/Historical Method <br> Non-High <br> School <br> Grades |  |
| :---: | :---: | :---: | :---: | :---: |
| ELA | 50 | High <br> School | Non-High <br> School <br> Grades | High <br> School |
| Math | 50 | 59 | 36 | 53 |

## MCAS Basics: Score Range Labels

| Achievement <br> Range: 440-560 |  | Growth Percentile <br> Range: 1-99 |  |
| :---: | :---: | :---: | :---: |
| Label | Scaled Score <br> Range | Label | SGP Range |
| Exceeding <br> Expectations | $530-560$ | Exceeded Typical <br> Growth | $60+$ |
| Meeting <br> Expectations | $500-529$ | Typical Growth - <br> High | $50-59$ |
| Partially Meeting <br> Expectations | $470-499$ | Typical Growth - Low | $40-49$ |
| Not Meeting <br> Expectations | $440-469$ | Low Growth | $\mathbf{3 0 - 3 9}$ |
| Very Low Growth |  |  |  |

Statewide, average SGPs were typically 30-39 for 2021.

## High Needs Group

Membership Definition:

- IEP
- EL and Former EL
- Economically Disadvantaged
$25 \%$ of students who took the MCAS were in the High Needs group.
WPS High Needs MCAS composition:
- $56 \%$ IEP alone
- $13 \%$ EL/FEL alone ( $6 \% \mathrm{EL}$ )
- $16 \%$ Economically Disadvantaged alone
- $14 \%$ combination of 2 or 3 characteristics

## 2021 ELA Results

# Spring 2021 ELA MCAS Percent Meeting/Exceeding and SGP 

|  | $3-8$ <br> \% Meet/Exceed | $\mathbf{3 - 8}$ <br> SGP | $\mathbf{1 0}$ <br> \% Meet/Exceed | 10 <br> SGP |
| :---: | :---: | :---: | :---: | :---: |
| All | $75 \%$ | T-Low | $92 \%$ | T-High |

## Spring 2021 ELA MCAS Percent Meeting/Exceeding and SGP

|  | $3-8$ <br> \% Meet/Exceed | $\mathbf{3 - 8}$ <br> SGP | $\mathbf{1 0}$ <br> \% Meet/Exceed | 10 <br> SGP |
| :---: | :---: | :---: | :---: | :---: |
| All | $75 \%$ | T-Low | $92 \%$ | T-High |
| High Needs | $50 \%$ | Low | $66 \%$ | T-High |
| Economically Disadvantaged | $44 \%$ | Low | $60 \%$ | T-High |
| EL \& Former EL | $65 \%$ | T-Low | - | - |
| Students with Disabilities | $43 \%$ | Low | $58 \%$ | T-High |

# Spring 2021 ELA MCAS Percent Meeting/Exceeding and SGP 

|  | $\mathbf{3 - 8}$ <br> \% Meet/Exceed | $\mathbf{3 - 8}$ <br> SGP | $\mathbf{1 0}$ <br> \% Meet/Exceed | 10 <br> SGP |
| :---: | :---: | :---: | :---: | :---: |
| All | $75 \%$ | T-Low | $92 \%$ | T-High |

## ELA Reporting Categories: Compared to State Average

Percent of points earned, by reporting category by grade, were greater than the state average.

## Areas of Strength:

- Language and writing in combination (essays): 4th, 5 th, 6th and 7th grades

## Areas for Growth:

- Language: 3rd, 7th, and 10th grades
- Language and writing in combination (essays): 3rd grade

## ELA Reporting Categories: Program Equitability across Racial/Ethnic Groups

Percent of points earned, by reporting category by grade, showed differences across racial/ethnic groups.

Areas of Strength:

- Reading: 3rd and 10th grades
- Language: 5th grade
- Language and writing in combination (essays): 10th grade

## Areas for Growth:

- Reading: 8th grade
- Language: 4th and 7th grades
- Language and writing in combination (essays): 8th grade

## Key Takeaways: ELA

## Highlights:

- Overall high performance
- Several non-high school groups with relatively high performance
- Students with disabilities had relatively high performance at both levels
- Overall, $5^{\text {th }}$ and older had less of a COVID effect than the state

Targeted efforts to better meet needs:

- Non-high school African American and Black students
- High school Hispanic or Latino students
- 3 rd and 4 th had more of a COVID effect than the state

## 2021 Math Results

## Math Reporting Categories: Compared to State Average

Percent of points earned, by reporting category by grade, were greater than the state average.

## Areas of Strength:

- Number operations in base ten: 3rd grade
- Measurement and data: 4th grade
- Number and operations - fractions: 4th and 5th grades
- Algebra and functions: 10th grade

## Areas for Growth:

- Geometry: 3rd and 5 th grades
- The number system: 6th grade
- Statistics and probability: 6th and 8th grades

## Math Reporting Categories: Program Equitability across Racial/Ethnic Groups

Percent of points earned, by reporting category by grade, showed differences across racial/ethnic groups.

Areas of Strength:

- Measurement and data: 3rd grade
- Number and operations in base ten: 3rd grade
- Number and operations - fractions: 3rd grade
- Operations and algebraic thinking: 3rd grade
- Statistics and probability: 10th grade

## Areas for Growth:

- Geometry: 6th and 8th grades
- Expressions and equations: 6th, 7th, and 8th grades

## Key Takeaways: Math

## Highlights:

- Overall high performance
- Students with disabilities at both levels had relatively high performance
- Overall less of a COVID effect than the state
- More equity in 3rd grade

## Targeted efforts to better meet needs:

- Non-high school African American and Black students
- 6th had more of a COVID effect than the state
- Inequity at the middle school level

VChange in Percent Meeting/Exceeding was 2+ points worse than statewide change.

## Science Reporting Categories: Compared to State Average

5th \& 8th grade science MCAS tests each cover three years of science.

Percent of points earned, by reporting category by grade taught, were greater than the state average.

## Areas of Strength:

- Earth and space science: 3 rd and 7 th grades
- Physical sciences: 5 th grade
- Technology/engineering: 4th grade
- Waves and their applications in technologies: high school

Areas for Growth:

- Earth and space science: 6th grade
- Life science: 4th and 5th grades
- Physical sciences: 3rd and 8th grades
- Technology/engineering: 7th and 8th grades

## Science Reporting Categories: Program Equitability across Racial/Ethnic Groups

5th \& 8th grade science MCAS tests each cover three years of science.
Percent of points earned, by reporting category by grade taught, showed differences across racial/ethnic groups.

Areas of Strength:

- Earth and space sciences: 7th grade
- Physical sciences: 3rd and 4th grades
- Technology/engineering: 5th grade

## Areas for Growth:

- Life science: 4th, 6th, and 8th grades
- Physical sciences: 8th grade

## Key Takeaways: Science

## Highlights:

- Overall high performance
- Students with disabilities had relatively high performance at both levels
- Less of a COVID effect than the state at elementary and high school levels

## Targeted efforts to better meet needs:

- High school economically disadvantaged students
- High school Hispanic or Latino students
- Middle school had more of a COVID effect than the state
- Life science, overall and regarding equity

## 2021 Peer District Comparisons

## Next Steps

## Next Steps

## Pandemic Recovery and Social Emotional Learning:

- WPS will assess students in the beginning of the school year in order to identify their instructional levels, adjust curriculum and instruction to close gaps caused by the pandemic, and strategically accelerate instruction to ensure students achieve grade level concepts and skills. Principals and teachers will collaborate in data teams, grade level teams and within departments to conduct data analysis and shared planning.
- WPS is conducting a thorough MCAS analysis of student performance relative to the standards and indicators, and adjusting instruction accordingly to support student learning.
- WPS will focus on social-emotional learning and a climate of care as a foundation for all student learning. SEL curriculum and instruction, as well as staff supports are prioritized for student well being.

## Next Steps

## 21st Century Learning:

- The district has invested in professional development to support teachers in creating highly differentiated, project-based learning lessons and units that integrate SEL, civic engagement, cross-content learning, complex thinking and student engagement.
- The district will continue to provide training and support to teachers as they pilot and assess PBL lessons and units across content areas.
- The Project-Based Learning Committee will oversee, monitor and assess the efficacy of project-based learning projects; codify each project by grade level, standards and skills; and create a district-wide compendium for all PK-12 teachers.

## Next Steps

## Diversity, Equity, \& Inclusion:

- WPS will implement a Panorama Student Equity and Inclusion Survey (Amplify Student Voices) to assess student beliefs, attitudes, perceptions on equity and inclusion.
- Equity Facilitators in each school provide professional development for staff on equity and high expectation teaching.

## Next Steps

## High Expectations Teaching:

- WPS educators will study the principles of high expectations teaching and learning, and engage in practical application through study groups and the High Expectations Teaching course from Research for Better Teaching.
- WPS leaders will learn the principles of Multi-Tiered Systems of Supports (MTSS) through professional development, and how to create the academic and social-emotional systems and structures that support all students with rigorous core instruction, tiered supports, and enrichment.
- WPS leaders will learn how to calibrate their understanding of effective instructional practice and high quality feedback through OPTIC: Online Platform for Teaching and Informed Calibration from MA DESE.

## Next Steps

## High Expectations Teaching:

- WPS leaders will learn the key components of a highly effective standards-based system through professional development.
- WPS leaders will develop common, consistent and proactive mechanisms to analyze student data, in order to systematically address disproportionality.
